Comments: The UAA was conducted in June 2005 and no WBCR was observed. The stream did not have enough depth to meet the WBCR use at 2 of 2 sites. Though estimated depths do not meet the WBCR requirement, the photos look like it is deep enough. Additionally, the downstream most site is about 1 mile from the mouth. Therefore, the committee feels there is not enough information to make a determination about the WBCR designation and recommends an interview or more data be gathered nearer mouth.

**Committee Recommendation:** ☐ Retain Use ☐ Modify Use ☐ Remove Use ☒ Inconclusive
